

SPRINT DIRECT MAIL

The most innovative direct mail finishing system available. Combining unique capabilities like single web expandable to multi-web, co-mingle offset & ink jet, patented clear channel register control, inline or near line operation, durability for increased "up time" and customization to fit every application.

SAVE COPIES FASTER

The VITS Sprint Direct Mail Line utilizes patented clear channel register control to quickly synchronize the cut to the signature in as few as two copies. This translates into less waste and more productivity.

EXPLORE NEW MARKETS

VITS is the only high speed, variable size, automated rotary cutter that can cut a chip "on demand" as well as adjust for variable size changes, zip sort or batch count. Combine multiple webs/ribbons, even integrate inkjet print with conventional offset print for an explosive new level of opportunities.

INLINE PLUS OFFLINE

The VITS Sprint Direct Mail Line can be installed inline with any inkjet press and can be run as an offline without special software or controls.
