

# ***SPRINT*** **VARIABLE DATA ROTARY CUTTER**

The ***SPRINT*** Variable Data Rotary Cutter is the latest technology for the digital inkjet web printing, packaging and finishing markets. The only high speed, multi-web capable rotary cutter designed specifically for digital inkjet finishing.

## **WHAT'S YOUR MARKET?**

The ***SPRINT*** Variable Data Rotary Cutter is as versatile as the markets it serves. Book production, Direct Mail, Commercial, Packaging, Converting, or Newspaper. The same unit can be used for either inline and/or near-line.

## **EXCLUSIVE FEATURES**

***SPRINT*** is the only high speed cutter that delivers multiple web capability. Our exclusive *Clear-Channel* register control and ultra-high speed knife positioning drive control provides single copy registration recovery.

## **DEPENDABILITY**

VITS has been delivering dependable, technologically advanced web finishing systems for more than 30 years to clients in more than 20 countries worldwide. At VITS, we don't follow change... we drive it!
